Dear Volunteers, Donors, Adopters and Supporters,

In the past years you have helped to celebrate Andy's Friends many successes. Over 3000 cats and kittens were rescued by our group. Every cat had excellent medical care and went on to be adopted into a safe and loving home. As you know we have turned the adoption portion of our rescue over to another agency. By allowing another agency to handle adoptions our focus can now be on relieving more suffering and providing medical care and supplies to many more desperate cats.

One of the sad situations we saw all too often at Andy's was when life circumstances changed and owners had difficulty affording veterinary care and supplies like food and litter for their cats. The loss of a job, a fixed income, a disability or health issue can cause serious financial hardship. Many times this resulted in the pets going hungry, suffering from treatable medical conditions or sadly being surrendered to shelters hoping against hope that they could find a home where they could be cared for properly. Andy's Friends will now be there to help these folks keep their cats healthy and happy in their homes with their families.

Andy's Friends Rescue, the rescue with the biggest heart and passion for the cats, has launched our new program to provide medical care for even more cats and kittens. We will not only be providing medical care for the stray, abandoned and homeless, but also precious kitties living in homes where medical care cannot be afforded. We want to support those who love their pets and want to do what is best for them but are in tough financial circumstances.

We will continue to work with our veterinarians' that provide services and medications at low cost so we can stretch the donations you so generously send. We continue our promise to always place the welfare of our cats first and hope you will continue to generously support our new mission. We cannot do this alone and there are little lives depending on us. We are grateful for the support you give to keep these well-loved kitties healthy, well fed and out of the shelter system.

Thank you for YOUR commitment to making a better life for the gentle souls who bring so much joy and love to so many. I hope you will continue to "open your heart and share the love" and continue to support us as we continue our journey to keep the kitties healthy and in their homes. There are still no paid employees and every dime we receive will be spent to help our cats. From the bottom of my heart I thank you...

With gratitude,

Beth Allen
Director
